The Loveliest Curly Hair So Easy to Have!

department has undertaken extensive seed planting in an effort to restore the black wainut. 150 bushels of seed have been planted in specially prepared ground at Mont Alto and should produce 100,000 seedlings for next spring. Many requests have been received from owners of woodland who desire to start groves of the trees.

A campaign of tree planting will begin in 1920 in Kentucky for the rejuvenation of the forests in which walnut will be one of the special species planted.

Walnut is said to have been used by the Romans, sometimes as veneer over cedar. During the Middle Ages it was a favorite wood for carving, beautiful welmut cabinets and doors being elaborate examples of the 15th and 16th century popular use of this beautifully grained wood. Why make your hair dry, brittle and cad looking with the heated waving ongs, when the simple silmerine method will produce a curliness far more atural in appearance, and at the same me preserve the lustre and beauty of our trawar? Judged elimerical and preserve the same of the same

Ime preserve the lustre and beauty of your tresses? Liquid silmerine is so agreeable to use, being neither sticky nor greasy, and the over-night transformation is so pleasing, the first trial will make it your firm friend.

The approved way to apply it is to pour a little into a saucer at bedtime, dip a clean tooth brush into this and fraw the brush through the hair from grown to tip, one strand at a time. A few ounces of this harmless liquid from your druggist will last a long time. You will like it not only because of the charming curly and ways effect, but because you will also find it an excellent dressing for the hair.

in the situation were the result of manipulation or monopoly, it might be dealt with by the usual legal measures, though prosecution and legislation are

the stronger publications should forego their advantage to a reasonable extent and enter into an agreement to curtail the consumption of paper. The agreement must be general and advertisers should give public-spirited help by assenting to restrictions of space. The Tribune would be glad to lead the movement for restriction, but has gone as far as it feels it is reasonable that it should go until a general agreement is put in force. It stands ready, however, to join in a general movement to bring consumption down to the level of supply and thus save a situation which must soon prove disastrous to many publications and a public misfortune.—Chicago Tribune.

RECONSTRUCTING LAND

LONDON, Dec. 19, (By Reciprocal News Service.—The London manager of

an American firm who returned re-

ently from 10 days' travel through Bel-

cently from 10 days' travel through Belgium and Holland, to investigate trade conditions, found prospects far brighter than he had expected.

"In Belgium everyone seemed happily at work," he said. "There was a street railway strike in Brussels that stirred up some had feeling, but otherwise capital and labor seemed to be working most harmoniously together for bigger and better output. There was no evidence of a shortage of food and for any New Yorker suffgring from boredom I should recommend the lively little capital of Brussels.

"Holland seemed extremely prosperous. The Dutch dealt both with Germany and the allies during the war, and therefore enjoyed fine business. Nearly every street in The Hague resounds with carpenters' hammers, and I was told that more building is going on there than in any other European city. "Rotterdam and Amsterdam are also exceedingly busy. Holland expects to do a great deal in the shipping world. Money seems free and easy, and prices generally are lower than in Lendon.

Money seems free and easy, and prices generally are lower than in London. To stay at the very best hotels, including all meals, costs only \$5 a day, considerably cheaper than in London and about half the similar expense in Paris.

RESTORATION OF BLACK

WALNUT HAS DECUN

WOOSTER, O., Dec. 19.—The restorestion of black walnut trees is being
considered in several states for 1920.
In Ohlo, the agricultural experiment
station in Wooster has just published a
pumphlet by Edmund Secrest of the
forestry section, on the cultivation of
these trees, attention being called to
the great value of the lumber in many
industries and its use in the great war
for airplanes and gun stocks, for which
no other substitute could be found in
sufficient quantities. Mr. Secrest says
that with proper care trees may be
grown from seed or transplanting of
small trees to a state of maturity
where the wood will be of as great
value as that of the original forest.
In Pennsylvania the state forestry
department has undertaken extensive
seed planting in an effort to restore
